This course is approved by the World Partners in Asset Management (WPIAM) for the AAMC Awareness in Asset Management Certificate.

Overview

This 1-day workshop was designed to introduce the concepts and principles of asset management to organizations. It focuses on the **why** and **what** of asset management. An increased awareness, understanding and confidence in asset management foundations encourages everyone to work together to deliver improved organizational outcomes.

All organizations are applying the concepts and principles of asset management daily. People make decisions, incur costs, and accept risk as they deliver products and services. Asset management provides the guiding principles to align strategic goals and objectives with tactical and operational activities and outcomes in all industries and across the entire lifecycle.

Asset Management Foundations Certificate Course Design

This course will introduce the key elements of the ISO 55001 and the GFMAM AM Landscape through the lens of real-world examples and application, not just theory. At the end of this one-day course, participants will have the confidence and ability to apply their learnings immediately within their workplace. This course includes an optional exam to meet the asset management knowledge qualifications for the World Partners in Asset Management's Awareness in Asset Management Certificate (AAMC).

Asset Management Foundations Certificate Course (AAMC)
